

Export made easy with Jira and Confluence Exporter

The Exporter plugin simplifies the export process, allowing for easy sharing, archiving, printing, or emailing of Jira issues and Confluence pages in PDF and Word formats. This leads to increased productivity and efficiency within organizations, as data is readily accessible. The Exporter plugin is a reliable tool that streamlines workflow and enhances operations.

Our Solution offers:

- ✔ **Effortless Exports:** Export issues in just a few clicks. Choose from multiple available templates, including basic issue exports, tables, and timesheets.
- ✔ **Limitless Template Customization:** Customize templates with your own code—the possibilities are endless!
- ✔ **Selective Exports:** Filter issues using JQL and handpick only the fields, custom fields, and sections you want to export.
- ✔ **Secure Downloads:** With Audit log support, track all downloads and ensure the security of your data.
- ✔ **Flexible Shareability:** Export issues to your device or send them over email with ease.

OAuth / OIDC Single Sign-On for Cloud

Integrating your Atlassian Cloud with an OAuth/OIDC provider is a breeze with miniOrange OAuth/OIDC SSO app. This app provides users with a seamless SSO experience while increasing the security of organizational data and boosting productivity. Say goodbye to integration woes and hello to streamlined authentication with miniOrange!

Our Solution offers:

- ✔ **Flexible Integration:** Integrate well-known OAuth/OIDC providers as well as OAuth/OIDC providers developed in-house
- ✔ **Enhanced Security:** Add an extra layer of security by introducing MFA on top of OAuth SSO
- ✔ **Easy Data Formatting:** Convert user data from an OAuth provider into a format that Atlassian Cloud can understand.

Secure Share

Looking for a quick and easy way to share your Confluence pages and Jira with users who aren't licensed or part of your organization? Look no further than Secure Share! With this one-stop solution, you can effortlessly create anonymous links and share your content with anyone, without worrying about security risks. Say goodbye to complicated sharing processes and hello to streamlined collaboration!

Our Solution offers:

- ✓ **External share:** Share Jira projects, filters, and boards with people outside your team effortlessly using our easy-to-use add-on
- ✓ **Fine-tuned permissions:** Control commenting and attachment permissions with granular precision using our add-on for Confluence and Jira.
- ✓ **Inline comments supported:** Add a touch of personality to collaboration with external user's ability to create new inline comments or reply to existing ones
- ✓ **Subscribe to page:** Stay updated with changes made to Confluence pages/Jira issues via anonymous link subscriptions that send you notifications.
- ✓ **Secure links:** Secure your anonymous links with passwords and expiry dates for complete control over who can access your content

User provisioning and SCIM

Our SCIM apps provide the ultimate solution for streamlining user management in Jira, Confluence, Bitbucket Crowd, and Jira Cloud. With a wide range of features, managing user data is seamless and hassle-free. Easily perform CRUD operations and manage your user base, including user deactivation based on the status on IDP like Okta, Azure AD, and onelogin. With support for SCIM protocol, user data is always up-to-date and accurate.

Our Solution offers:

- ✓ **Saving license cost:** Jira/Confluence users can be deactivated promptly if their status in the Identity provider is marked as deleted or deactivated.
- ✓ **Access Management:** Streamline user/group management and group assignment through Identity Provider in Atlassian suite with create, update, and delete functionalities.
- ✓ **Custom Profile Attributes Sync:** Sync user attributes like employee ID, manager, or department in Jira or Confluence based on the data stored in the central directory.
- ✓ **Provisioning with unsupported IDP:** In case your IDP lacks SCIM protocol support, user provisioning can still be achieved via REST API. Our platform accommodates IDPs such as Google Workspace, Keycloak, and more.

About Us

miniOrange offers a comprehensive range of security products like IAM, CIAM, PAM solutions, to address the distinct security requirements of businesses of all sizes and across various industries.

We possess over 10+ years of experience in the security domain, and we continuously leverage that expertise to provide exceptional service to our customers.
