

Multi-Factor Authentication

Cause passwords just aren't enough

miniOrange

Choose the Atlassian market's leading MFA app with unbeatable features and a proven track record of success

You know what's better than one bouncer guarding the club entrance? Two bouncers! That's exactly what MFA does for your Atlassian account. It's like adding an extra layer of security, so those pesky hackers can't sneak in and party without an invite.

MFA app feature set:

- ✓ Multiple MFA methods supported
- ✓ Protection against Brute force 2FA attacks
- ✓ Skip 2FA on SSO to avoid redundant authentication steps
- ✓ Remember your device during 2FA verification for improved usability
- ✓ Audit logs to give overview for admins

Authentication methods that protect your Atlassian Suite

Web Authenticator

Mobile Authenticator

Hardware Token

Duo Push

OTP via Mail

OTP via SMS

Security Question

Backup Code

Major Features:

MFA Support for JSM customers

Secure JSM portal access with 2-factor authentication for enhanced user verification and protection against unauthorized access and data breaches.

Flawless MFA in Crowd

Implement multi-factor authentication to protect user data in CROWD, ensuring secure access and reducing the risk of unauthorized access and data breaches.

Skip 2FA on trusted IP

Implement whitelisting to skip 2FA for users accessing from a trusted IP address, improving user experience without compromising security.

About Us

miniOrange offers a comprehensive range of security products like IAM, CIAM, PAM solutions, to address the distinct security requirements of businesses of all sizes and across various industries.

We possess over 10+ years of experience in the security domain, and we continuously leverage that expertise to provide exceptional service to our customers.
